

What are head lice?

Teeny, tiny bugs (like sesame seeds) that nest in your hair and suck your blood.

How can I tell I have lice?

If your head is real itchy, check for little beige eggs and brown bugs crawling around.

Where do lice come from?

They can't jump or fly... they crawl from one head to another, or from a comb, hat or jacket that's been shared...

Break the Lice Life Cycle

1. Kill Lice!

Use pesticide free non-toxic **Lice Trap Shampoo** to remove head lice!

LICE TRAP

SHAMPOO™

MOUSSE FOAM

2. Remove Nits!

Remove all eggs. Still some lice eggs may survive after the Lice Trap Shampoo treatment. **All eggs must be removed to break the lice cycle.** Use our **Lice Trap Comb** to assist locating all stubborn eggs, and help remove any remaining lice & nits.

3. Clean House!

Wash your clothes, sheets, combs and brushes, put your toys in a plastic bag for at least 2 weeks and vacuum.
